Giovanni Salinas

Taipei, Taiwan (R.O.C) | gsalinaslopez@gmail.com | +886 919204040
linkedin.com/in/gsalinaslopez | github.com/gsalinaslopez | Python, Java/Kotlin, Swift

Experience

Appier (沛星互動科技) *Apr 2022 - Aug 2025*
Software Engineer *Taipei, Taiwan*

- Ensured continuous release process verification for **Frontend/Backend/Mobile** platforms by designing test plans based on feature specifications and implementing automated regression testing scripts and pipelines
- Increased the scalability of internal testing for **Android/iOS/React Native/Flutter** mobile SDKs by developing a unified **Python/Appium** codebase, enabling cross-platform compatibility and reducing maintenance overhead
- Achieved 80% core feature coverage in UI regression testing by implementing a baseline testing suite using **Python/TypeScript/Playwright**, improving overall test reliability and automation efficiency

ACpay (交流資服) *Feb 2021 - Feb 2022*
Software Engineer *Hsinchu, Taiwan*

- Improved the company's POS device **Java/Kotlin/Android** application by migrating to a modern tech stack (MVVM, LiveData, DataStore, Coroutines, Flow/RxJava), which improved stability and maintainability
- Enhanced the user experience and development efficiency by fixing critical issues, adding new features, and implementing a robust CI/CD pipeline and unit testing
- Composed documentation and UML diagrams describing the app's software structure and its different modules and their interactions

Industrial Technology Research Institute (工業技術研究院) *Jan - Jun 2018 | Jul - Aug 2017*
Software Developer. *Part-time (2018) | Internship (2017)* *Hsinchu, Taiwan*

- Developed a **Java/Android** encoder/decoder *(BER)* API wrapper for intelligent transportation networks by porting a native **C** runtime library *(ASN.1 C)* using Android NDK
- Implemented **Java/Android** high-level API wrappers for interfacing with the device's LTE Evolved Multimedia Broadcast Multicast Services *(eMBMS)*

EpiSonica (振磬科技) *Sep 2016 - Oct 2017*
Software Developer. *Part-time* *Hsinchu, Taiwan*

- Improved the company's ultrasonic medical device usage workflow by fixing critical UI/UX bugs in **C++/Qt**
- Developed hardware-software communication functionality using USB device interface serial communications

GeoThings (究心科技) *Dec 2015 - Aug 2016*
Software Developer. *Part-time* *Hsinchu, Taiwan*

- Designed UI/UX for an **iOS/Swift** mobile mapping tool by writing RESTful callbacks for fetching, processing, and displaying map information from OpenStreetMap
- Implemented a map tagging feature that uploads user-contributed data to the OpenStreetMap project database using RESTful

Education

National Chiao Tung University (國立交通大學) *October 2020*
Masters in Electrical Engineering and Computer Science. *GPA: 3.61, Percentile: 81.48/100* *Hsinchu, Taiwan*

National Chiao Tung University (國立交通大學) *June 2016*
Undergraduate in Computer Science. *GPA: 2.85, Percentile: 73.13/100* *Hsinchu, Taiwan*

Technical Skills

Software Tools

- **Mobile App development**: Android Studio *(Android - Java/Kotlin)*, XCode *(iOS - Swift)*
  Python: Testing *(pytest, appium, playwright)*, Data Sciences *(pandas, numpy, matplotlib, tensorflow)*
  Version Control: Git, jj, **CI/CD**: Jenkins, GH Actions
